

Attention: Small Business and General Business Tax Break - Consultation Business Tax Division

The new "Tax Breaks" are a good initiative, however we are disappointed that these early deductions for Capital Allowance expenditure do not extend to Capital Works projects.

Particularly in country regions where building and grounds improvement and construction projects employ our local people more so than buying vehicles and computers, which are probably imported.

We would be delighted to see some "Tax Breaks" in this area for the full 30% or even some lesser amount.

Regards

The Board of Directors
