SUBMISSION

Exposure Draft - Currency (Restrictions on the Use of Cash) Bill 2019

This Bill is Trojan Horse legislation. to use a Black Economy fear tactic to enhance the BAIL-IN (Stealing) of bank deposits.

A typical problem, reaction solution tactic is used to brain wash the public supposedly to restrict the use of cash when behind the scene it is really about bailing in bank deposits to save banks from collapsing due to their corrupt practices.

eg. No Fiduciary Obligations adhered to.

The fact that KPMG is behind this shows how desperate the bankers and compliant governments are to steal people's deposits

NO BAIL IN OF BANK DEPOSITS.

This law should be scrapped and the banking system reformed starting with Glass Steagall legislation.

LETTERS TO THE

BANKING ON A FAIR GO

THE Banking Inquiry Royal Commission needs to be a People's Royal Commission into Banking and not a Bankers Royal Commission into Banking that would cover up banking practices.

The fraud of banks credit creation out of nothing needs to be exposed.

All bank loans should contain an Origin of Funds Declaration clause in their documents stating that the sum of the loan was created out of nothing under a capital adequacy ratio of for example ten to one.

With record personal and national debt levels occurring there is a fiduciary obligation on banks to let borrowers of credit (really debt) know what they are getting into.

It is 324 years since the Bank of England formed in 1694 and more people need to wake and expose corrupt banking practices and be able to have their say.
