## 

## INDEPENDENT AUDITOR'S REPORT

## To the Treasurer

## Scope

I have audited the accompanying financial statements of the Department of the Treasury for the year ended 30 June 2009, which comprise: a Statement by the Secretary and Chief Financial Officer, Income statement; Balance sheet; Statement of changes in equity; Cash flow statement; Schedule of commitments; Schedule of contingencies; Schedule of Administered Items and Notes to and forming part of the financial statements, including a Summary of significant accounting policies.

## The Responsibility of the Secretary for the Financial Statements

The Secretary is responsible for the preparation and fair presentation of the financial statements in accordance with the Finance Minister's Orders made under the Financial Management and Accountability Act 1997, including the Australian Accounting Standards (which include the Australian Accounting Interpretations). This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

## Auditor's Responsibility

My responsibility is to express an opinion on the financial statements based on my audit. I have conducted my audit in accordance with the Australian National Audit Office Auditing Standards, which incorporate the Australian Auditing Standards. These auditing standards require that I comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Department of the Treasury's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Department of the Treasury's intemal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Secretary, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

## Independence

In conducting the audit, I have followed the independence requirements of the Australian National Audit Office, which incorporate the requirements of the Australian accounting profession.

## Auditor's Opinion

In my opinion, the financial statements of the Department of the Treasury:
(a) have been prepared in accordance with the Finance Minister's Orders made under the Financial Management and Accountability Act 1997. including the Australian Accounting Standards; and
(b) give a true and fair view of the matters required by the Finance Minister's Orders including the Department of the Treasury's financial position as at 30 June 2009 and its financial performance and cash flows for the year then ended.

Australian National Audit Office

7 September 2009

## THE TREASURY

## Statement by the Departmental Secretary and Chief Financial Officer

## Certification of financial statements

In our opinion, the attached financial statements for the year ended 30 June 2009 are based on properly maintained financial records and give a true and fair view of the matters required by the Finance Minister's Orders made under the Financial Management and Accountability Act 1997, as amended.

Ken Henry
Secretary to the Treasury

Rob Lonely
Chief Financial Officer

## Income statement

[^2]Statement of activities administered on behalf of Government
The major administered activities of the Treasury are directed towards achieving the four outcomes described in Note 1 to the Financial Statements. Details of planned activities for the year can be found in the Treasury Portfolio Budget Statements, Portfolio Additional Estimates Statements and Portfolio Supplementary Estimates Statements for 2008-09, which have been tabled in Parliament.

THE TREASURY
ANNUAL REPORT 2008-09

## Note 1: Summary of significant accounting policies

### 1.1 Objectives of the Treasury

The Treasury's mission is to improve the wellbeing of the Australian people by providing sound and timely advice to the Government, based on objective and thorough analysis of options, and by assisting Treasury Ministers in the administration of their responsibilities and the implementation of government decisions.

The Treasury is structured to meet four outcomes:
Outcome 1: Sound macroeconomic environment;
Outcome 2: Effective government spending arrangements;
Outcome 3: Effective taxation and retirement income arrangements; and Outcome 4: Well functioning markets.

The reporting entity, hereafter referred to as 'the Treasury', comprises the Treasury and the Australian Government Actuary.

Activities contributing towards the outcomes detailed above are classified as either departmental or administered. Departmental activities involve the use of assets, liabilities, revenues and expenses controlled or incurred by the Treasury in its own right. Administered activities involve the management or oversight by the Treasury on behalf of the Government, of items controlled or incurred by the Government. For these purposes, the HIH Claims Support Limited and the HIH Scheme have been included in the administered schedules.

Departmental and administered activities are identified under four Output Groups.
Outcome 1 has one output group, 1.1 Macroeconomic. Outcome 2 has one output group, 2.1 Fiscal. Outcome 3 has one output group, 3.1 Revenue and Outcome 4 has one output group, 4.1 Markets.

The output groups comprise the following outputs:

- Output Group 1.1 Macroeconomic — Outputs 1.1.1 and 1.1.2;
- Output Group 2.1 Fiscal — Outputs 2.1.1, 2.1.2, 2.1.3 and 2.1.4;
- Output Group 3.1 Revenue - Outputs 3.1.1 and 3.1.2; and
- Output Group 4.1 Markets — Outputs 4.1.1, 4.1.2, 4.1.3 and 4.1.4

All outputs under Output Groups 1.1, 2.1 and 3.1 provide services on a non-profit basis.
Under Output Group 4.1, Outputs 4.1.1, 4.1.2 and 4.1.3 also provide services on a non-profit basis. Output 4.1.4, relates to the Australian Government Actuary which operates via a special account.

The continued existence of the Treasury in its present form and with its present programs is dependent on Government policy and on continuing appropriations by Parliament for the Treasury's administration and programs.

### 1.2 Basis of preparation of the financial report

The financial statements are required by section 49 of the Financial Management and Accountability Act 1997 and are a general purpose financial report.

The Financial Statements and notes have been prepared in accordance with:

- Finance Minister's Orders (FMOs) for reporting periods ending on or after 1 July 2008; and
- Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) that apply for the reporting period.

The financial report has been prepared on an accrual basis and is in accordance with historical cost convention, except for certain assets at fair value. Except where stated, no allowance is made for the effect of changing prices on the results or the financial position.

The financial report is presented in Australian dollars and values are rounded to the nearest thousand dollars unless otherwise specified.

Unless alternative treatment is specifically required by an accounting standard or the FMOs, assets and liabilities are recognised in the balance sheet when and only when it is probable that future economic benefits will flow to the Treasury or a future sacrifice of economic benefits will be required and the amounts of the assets or liabilities can be reliably measured. However, assets and liabilities arising under Agreements Equally Proportionately Unperformed are not recognised unless required by an accounting standard. Liabilities and assets that are unrecognised are reported in the schedule of commitments and the schedule of contingencies.

Unless alternative treatment is specifically required by an accounting standard or the FMOs, income and expenses are recognised in the income statement when and only when the flow, consumption or loss of economic benefits has occurred and can be reliably measured.

Administered revenues, expenses, assets, liabilities and cash flows reported in the Schedule of Administered Items and related notes are accounted for on the same basis and using the same policies as for departmental items, except where otherwise stated at Note 1.22.

### 1.3 Significant accounting judgments and estimates

Apart from an Australian Government Actuary review on employee benefits resulting in changes to on-cost calculations and discount factors, no accounting assumptions or estimates have been identified for departmental items that have a significant risk of causing
a material adjustment to carrying amounts of assets and liabilities within the next accounting period.

In the process of applying the accounting policies for administered items listed in Notes 1.29 and 1.30, the Treasury has obtained independent actuarial assessments of the HIH Claims Support Scheme liability and the Housing Loans Insurance Corporation (HLIC) premiums, recoveries, claims and acquisition costs.

In relation to uncalled shares disclosed in the administered contingencies table, the Treasury has judged the risk of these shares being called as low for the foreseeable future. This judgment is based on historical and current performance of the international financial institutions. Some of the factors considered are the financial strength of the development banks (that is, most have AAA credit ratings), established risk management policies, healthy debt ratios, no adverse financial statement audit opinions and the fact that no calls have ever been made.

### 1.4 Changes in Australian Accounting Standards

## Adoption of new Australian Accounting Standard requirements

No accounting standard has been adopted earlier than the application date as stated in the standard. None of the new standards, amendments to standards and interpretations issued by the AASB that are applicable to the current period have had a material financial impact on the Treasury. The following standards or amendments to standards have become effective but have had no financial impact to the operations of the Treasury.

## Standards

- AASB 139 Financial Instruments: Recognition and Measurement
- AASB 1050 Administered items
- AASB 1052 Disaggregated items

## Future Australian Accounting Standard requirements

Of the new standards, amendments to standards and interpretations issued by the AASB that are applicable to future periods, it is estimated that the impact of adopting the pronouncements when effective will have no material financial impact on future reporting periods but may affect disclosures in future financial reports.

### 1.5 Revenue

## Revenue from Government

Amounts appropriated for departmental output appropriations for the year (adjusted for any formal additions and reductions) are recognised as revenue when the agency gains control of the appropriation, except for certain amounts that relate to activities that are reciprocal in nature, in which case revenue is recognised only when it has been earned.

## Appropriations receivable are recognised at their nominal amounts.

## Other types of revenue

Revenue from the sale of goods is recognised when:

- the risks and rewards of ownership have been transferred to the buyer;
- the seller retains no managerial involvement nor effective control over the goods;
- the revenue and transaction costs incurred for the transaction can be reliably measured; and
- it is probable that the economic benefits associated with the transaction will flow to the entity.

Revenue from rendering of services is recognised by reference to the stage of completion of contracts at the reporting date. The revenue is recognised when:

- the amount of revenue, stage of completion and transaction costs incurred can be reliably measured; and
- it is probable that the economic benefits associated with the transaction will flow to the entity.

The stage of completion of contracts at the reporting date is determined by reference to the proportion that costs incurred to date bear to the estimated total costs of the transaction.

Receivables for goods and services, which have 30 day terms, are recognised at the nominal amounts due, less any impairment allowance account. Collectability of debts is reviewed at balance date. Allowances are made when collectability of the debt is no longer probable.

### 1.6 Gains

Resources received free of charge
Resources received free of charge are recognised as gains when and only when a fair value can be reliably determined and the services would have been purchased if they had not been donated. Use of those resources is recognised as an expense.

Contributions of assets at no cost of acquisition or for nominal consideration are recognised as gains at their fair value when the asset qualifies for recognition, unless received from another Government agency or authority as a consequence of a restructuring of administrative arrangements (refer to Note 1.7).

Resources received free of charge are recorded as either revenue or gains depending on their nature.

## Sale of assets

Gains from disposal of non-current assets are recognised when control of the asset has passed to the buyer.

### 1.7 Transactions with the Government as owner

## Equity injections

Amounts appropriated which are designated as 'equity injections' for a year (less any formal reductions) are recognised directly in contributed equity in that year.

## Restructuring of administrative arrangements

Net assets received from or relinquished to another Australian Government agency or authority under a restructuring of administrative arrangements are adjusted at their book value directly against contributed equity.

## Other distributions to owners

The FMOs require that distributions to owners be debited to contributed equity unless in the nature of a dividend.

### 1.8 Employee benefits

Liabilities for services rendered by employees are recognised at the reporting date to the extent that they have not been settled.

Liabilities for 'short-term employee benefits' (as defined by AASB 119 Employee Benefits) and termination benefits due within 12 months of balance date are measured at their nominal amounts.

The nominal amount is calculated with regard to the rates expected to be paid on settlement of the liability.

All other employee benefit liabilities are measured as the present value of the estimated future cash outflows to be made in respect of services provided by employees up to the reporting date.

## Leave

The liability for employee benefits includes provision for annual leave and long service leave. No provision has been made for sick leave as all sick leave is non-vesting and the average sick leave taken in future years by employees of the Treasury is estimated to be less than the annual entitlement for sick leave.

The leave liabilities are calculated on the basis of employees' remuneration, including the Treasury's employer superannuation contribution rates to the extent that the leave is likely to be taken during service rather than paid out on termination.

The liability for both annual and long service leave has been determined by reference to the work of the Australian Government Actuary as at 30 June 2009. The estimate of the present value of the liability takes into account attrition rates and pay increases through promotion and general pay increases.

## Separation and redundancy

No provision has been made for separation and redundancy benefit payments during the year (2008: Nil).

## Superannuation

Employees of the Treasury are members of the Commonwealth Superannuation Scheme (CSS), the Public Sector Superannuation Scheme (PSS) or the PSS accumulation plan (PSSap).

The CSS and PSS are defined benefit schemes of the Australian Government. The PSSap is a defined contribution scheme which opened for new employees on 1 July 2005.

The liability for defined benefits is recognised in the financial statements of the Australian Government and is settled by the Australian Government in due course. This liability is reported by the Department of Finance and Deregulation as an administered item.

The Treasury makes employer contributions to the employee superannuation scheme at rates determined by an actuary to be sufficient to meet the cost to the government of the superannuation entitlements of the Treasury's employees. The Treasury accounts for the contribution as if they were contributions to defined contribution plans.

The liability for superannuation recognised as at 30 June represents outstanding contributions for the final fortnight of the year.

### 1.9 Leases

A distinction is made between finance leases and operating leases. Finance leases effectively transfer from the lessor to the lessee substantially all the risks and benefits incidental to ownership of leased non-current assets. In operating leases, the lessor effectively retains substantially all such risks and benefits.

Where a non-current asset is acquired by means of a finance lease, the asset is capitalised at either the fair value of the lease property or, if lower, the present value of minimum lease payments at the inception of the contract and a liability is recognised at the same time and for the same amount.

The discount rate used is the interest rate implicit in the lease. Leased assets are amortised over the period of the lease. Lease payments are allocated between the principal component and the interest expense. At reporting date, the Treasury had finance leases with
terms averaging 2.75 years and a maximum term of 3.25 years. The interest rate implicit in the leases averaged 6.24 per cent (2008: 7.11 per cent). The lease assets secure the lease liabilities.

Operating lease payments are expensed on a straight line basis which is representative of the pattern of benefits derived from the leased assets.

### 1.10 Borrowing costs

All borrowing costs are expensed as incurred.

### 1.11 Cash

Cash and cash equivalents includes notes and coins held and any deposits in bank accounts with an original maturity of three months or less that are readily convertible to known amounts of cash and subject to insignificant risk of changes in value. Cash is recognised at its nominal amount. Any interest receivable is credited to revenue as it accrues. The Treasury maintains bank accounts with the Reserve Bank of Australia for administration of the receipt and payment of monies.

### 1.12 Financial risk management

The Treasury's activities expose it to normal commercial financial risk. As a result of the nature of the Treasury's business and internal and Australian Government policies, dealing with the management of financial risk, the Treasury's exposure to market, credit, liquidity, cash flow and fair value interest rate risk is considered to be low.

### 1.13 Other financial instruments

Loans and receivables
Trade receivables, loans and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. They are included in current assets, except for maturities greater than 12 months after the balance date. These are classified as non-current assets. Loans and receivables are measured at amortised cost using the effective interest methods less impairment. Interest is usually recognised by applying the effective interest rate. Collectability of debts is reviewed regularly throughout the year and at balance date. Provisions are made when collection of the debt is judged to be less rather than more likely. Credit terms are net 30 days (2008: 30 days).

## Trade creditors

Trade creditors and accruals are recognised at amortised cost. Liabilities are recognised to the extent that the goods or services have been received (and irrespective of having been invoiced). Settlement is usually made net 30 days.

### 1.14 Impairment of financial assets

Financial assets are assessed for impairment at each balance date.

## Financial assets held at amortised cost

If there is objective evidence that an impairment loss has been incurred for loans and receivables or held to maturity investments held at amortised cost, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate.
The carrying amount is reduced by way of an allowance account. The loss is recognised in the income statement.

## Available for sale financial assets

If there is objective evidence that an impairment loss on an available for sale financial asset has been incurred, the amount of the difference between its cost, less principal repayments and amortisation, and its current fair value, less any impairment loss previously recognised in expenses, is transferred from equity to the income statement.

## Available for sale financial assets (held at cost)

If there is objective evidence that an impairment loss has been incurred the amount of the impairment loss is the difference between the carrying amount of the asset and the present value of the estimated future cash flows discounted at the current market rate for similar assets.

### 1.15 Contingent liabilities and contingent assets

Contingent liabilities and contingent assets are not recognised in the balance sheet but are reported in the relevant schedules and notes. They may arise from uncertainty as to the existence of a liability or asset, or represent an asset or liability in respect of which the amount cannot be reliably measured. Contingent assets are reported when settlement is probable but not virtually certain and contingent liabilities are recognised when the probability of settlement is greater than remote.

### 1.16 Acquisition of assets

Assets are recorded at cost on acquisition except as stated below. The cost of acquisition includes the fair value of assets transferred in exchange and liabilities undertaken. Financial assets are initially measured at their fair value plus transaction costs where appropriate.

### 1.17 Property, plant and equipment

Asset recognition threshold
Purchases of property, plant and equipment are recognised initially at cost in the balance sheet, except for purchases costing less than $\$ 2,000$, which are expensed in the year of acquisition (other than where they form part of a group of similar items which are significant and total $\$ 20,000$ or more).

Assets acquired at no cost, or for nominal consideration, are initially recognised as assets and revenues at their fair value at the date of acquisition, unless acquired as a consequence of restructuring of administrative arrangements. In the latter case, assets are initially recognised as contributions by owners at the amounts at which they were recognised in the transferor agency's accounts immediately prior to the restructuring.

## Revaluations

Fair values for each class of asset are determined as shown below.

| Asset class | Fair value measured at |
| :--- | :--- |
| Leasehold improvements | Depreciated replacement cost |
| Infrastructure, plant and equipment | Market selling price |

Following initial recognition at cost, property, plant and equipment are carried at fair value less subsequent accumulated depreciation and accumulated impairment losses. Valuations are conducted with sufficient frequency to ensure that the carrying amounts of assets do not materially differ from the assets' fair values as at the reporting date. The regularity of independent valuations depends upon the volatility of movements in market values for the relevant assets.

Revaluation adjustments are made on a class basis. Any revaluation increment is credited to equity under the heading of asset revaluation reserve except to the extent that it reverses a previous revaluation decrement of the same asset class that was previously recognised through the operating result. Revaluation decrements for a class of assets are recognised directly through the operating result except to the extent that they reverse a previous revaluation increment for that class.

Any accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the asset restated to the revalued amount.

The Treasury performed a valuation of leasehold improvements, infrastructure, plant and equipment assets on 30 November 2007. The valuation was performed by independent valuers Preston Rowe Paterson NSW Pty Limited and was based on valuing the assets at fair value.

## Depreciation

Depreciable property, plant and equipment assets are written-off to their estimated residual values over their estimated useful lives to the Treasury using, in all cases, the straight-line method of depreciation.

Depreciation rates (useful lives), residual values and methods are reviewed at each reporting date and necessary adjustments are recognised in the current, or current and future reporting periods, as appropriate.

Depreciation rates applying to each class of depreciable asset are based on the following useful lives:

| Computers, plant and equipment | $2008-09$ | $3-10$ years |
| :--- | ---: | ---: |
| Leasehold improvements | $5-10$ years | $5-10$ years |
| Motor vehicles | 4 years | 4 years |
| Office equipment | 5 years | 5 years |

The aggregate amount of depreciation allocated for each class of asset during the reporting period is disclosed in Note 4D.

## Impairment

All assets were assessed for impairment at 30 June 2009. Where indications of impairment exist, the asset's recoverable amount is estimated and an impairment adjustment made if the asset's recoverable amount is less than its carrying amount.

No indicators of impairment were found for assets at fair value.
The recoverable amount of an asset is the higher of its fair value less costs to sell and its value in use. Value in use is the present value of the future cash flows expected to be derived from the asset. Where the future economic benefit of an asset is not primarily dependent on the asset's ability to generate future cash flows, and the asset would be replaced if the Treasury were deprived of the asset, its value in use is taken to be its depreciated replacement cost.

### 1.18 Intangibles

The Treasury's intangible assets comprise internally developed and purchased software for internal use. These assets are carried at cost less accumulated depreciation and any accumulated impairment losses. Software is amortised on a straight-line basis over its anticipated useful life. The useful lives of the Treasury's software are 3 to 5 years (2007-08: 3 to 5 years).

The Treasury's largest intangible asset under construction is for Standard Business Reporting (SBR). SBR is a multi-agency initiative that will simplify business-to-government reporting by introducing a single secure way to interact on-line with participating agencies, for further information visit www.sbr.gov.au.

All software assets were assessed for indications of impairment as at 30 June 2009.

### 1.19 Taxation/competitive neutrality

The Treasury is exempt from all forms of taxation except fringe benefits tax and the goods and services tax (GST).

Revenues, expenses and assets are recognised net of GST:

- except where the amount of GST incurred is not recovered from the Australian Taxation Office; and
- except for receivables and payables.

### 1.20 Foreign currency

Transactions denominated in a foreign currency are converted at the exchange rate at the date of the transaction. Foreign currency receivables and payables are translated at the exchange rates current as at balance date.

### 1.21 Insurance

The Treasury is insured for risks through the government's insurable risk managed fund, Comcover. Workers compensation is insured through the government's insurable risk managed fund, Comcare Australia.

### 1.22 Reporting of administered activities

Administered revenues, expenses, assets, liabilities and cash flows are disclosed in the schedule of administered items and related notes.

Except where otherwise stated below, administered items are accounted for on the same basis and using the same policies as for departmental items, including the application of Australian Accounting Standards.

### 1.23 Administered cash transfers to and from the Official Public Account

Revenue collected by the Treasury for use by the Australian Government rather than the Treasury is administered revenue. Collections are transferred to the Official Public Account (OPA) maintained by the Department of Finance and Deregulation. Conversely, cash is drawn from the OPA to make payments under Parliamentary appropriation on behalf of the Australian Government. These transfers to and from the OPA are adjustments to the administered cash held by the Treasury on behalf of the Australian Government and reported as such in the statement of cash flows in the schedule of administered items and in
the administered reconciliation table in Note 20. The schedule of administered items largely reflects the Australian Government's transactions, through the Treasury, with parties outside the Australian Government.

### 1.24 Administered revenue

All administered revenues are revenues relating to the course of ordinary activities performed by the Treasury on behalf of the Australian Government.

## Reserve Bank of Australia dividend

Dividends from the Reserve Bank of Australia (RBA) are recognised when a determination is made by the Treasurer and thus control of the income stream has been established. On this basis, the RBA's dividend for 2007-08 is recognised in the Treasury's financial statements in 2008-09. Dividends are measured at nominal amounts.

The Treasurer is able to determine what portion of the RBA's earnings is made available as a dividend to the Australian Government having regard to the Reserve Bank Board's advice and in accordance with section 30 of the Reserve Bank Act 1959.

## International Monetary Fund remuneration

Remuneration is interest paid by the International Monetary Fund (IMF) to Australia for the use of its funds. It includes the proportion of the member currencies (quota) that was paid in Special Drawing Rights (SDR) and held by the IMF and money lent out under the financial transaction plan.

Where the IMF's holdings of Australian dollars fall below a specified level, it pays remuneration on Australia's average remunerated reserve tranche position. The rate of remuneration is equal to the SDR interest rate. This rate is then adjusted to account for the financial consequences of overdue obligations to the IMF which are shared between members and reflected in Note 16 as burden sharing.

Remuneration is calculated and paid at the end of the IMF's financial quarters. An annual Maintenance of Value adjustment is made to the IMF's holdings of the quota to maintain their value in terms of the SDR.

## Guarantee Scheme for Large Deposits and Wholesale Funding

Under the Guarantee Scheme for Large Deposits and Wholesale Funding, a fee is paid to guarantee the portion of eligible deposits over $\$ 1$ million. The fees are reported as a fee for service in accordance with AASB 118 - Revenue.

## Financial Guarantee Contracts

Financial guarantee contracts are accounted for in accordance with AASB 139. They are not treated as a contingent liability, as they are regarded as financial instruments outside
the scope of AASB 137. The Treasury's administered financial guarantee contracts relate to components of the Guarantee Scheme for Large Deposits and Wholesale Funding.

### 1.25 Administered capital

Appropriations of administered capital are recognised in administered equity where the amounts appropriated by Parliament are drawn down. For the purposes of the Treasury annual report, administered equity transactions are not disclosed separately.

### 1.26 Grants

The Treasury administers a number of grant schemes on behalf of the Australian Government.

Grant liabilities are recognised to the extent that (i) the services required to be performed by the grantee have been performed or (ii) the grant eligibility criteria have been satisfied, but payments due have not been made. A commitment is recorded when the Australian Government enters into an agreement to make these grants but services have not been performed or criteria satisfied.

## Grants to the IMF

This represents Australia's contribution to the Poverty Reduction and Growth Facility (PRGF), of the IMF. The PRGF will enable the IMF to provide concessional funding to support medium term macroeconomic adjustment and structural reforms in low income countries. The PRGF will assist Australia to promote its international economic and aid interests with developing countries in the Asian region. Australia's contribution involves $\$ 30$ million to be paid in annual instalments of $\$ 2.5$ million over a 12 year period, with the final instalment paid during 2008-09.

## Grants to States and Territories

The Council of Australian Governments (COAG) federal financial framework reforms (the framework) commenced with effect from 1 January 2009. Under the framework, the Treasurer is accountable for the efficient payment of National Partnership (NP) and general revenue grants to the States and Territories. Portfolio Ministers are accountable for relevant Government policy associated with those payments. In addition the Treasurer is accountable for payment and policy associated with GST revenue grants and National Specific Purpose Payments (SPP). An overview of the Government's policy in respect of accountabilities under the new financial framework is presented in the 2009-10 Budget papers, Part 6 of Budget Paper No. 3, Australia's Federal Relations.

There are four main types of grant payments under the framework, as follows:

- National SPPs - a financial contribution to support a State or Territory to deliver services in a particular sector.
- NP payments - a financial contribution in respect of a NP agreement to a State or Territory to support the delivery of specific projects, to facilitate reforms or to reward those jurisdictions that deliver on national reforms or achieve service delivery improvements.
- GST revenue grants - a financial contribution to a State or Territory which is available for use by the States and Territories for any purpose.
- General revenue assistance (GRA) other than GST revenue grants - a financial contribution to a State or Territory which is available for use by the States and Territories for any purpose.

The National SPPs and GST revenue grants are paid under a special appropriation from the Federal Financial Relations Act 2009. After the end of the financial year, the Treasurer makes a determination of the amounts that should have been paid and an adjustment is made in respect of advances that were paid during the financial year. The authority to determine the amount and timing of advances has been delegated to the General Manager, Commonwealth-State Relations Division.

The NP and GRA payments are paid under the Federal Financial Relations Act 2009 through a determination process wherein the Treasurer may determine an amount to be paid to a State for the purpose of making a grant of financial assistance. Once determined, this amount must be credited to the COAG Reform Fund and the Treasurer must ensure that, as soon as practicable after the amount is credited, the COAG Reform Fund is debited for the purposes of making the grant. In addition the Treasurer must have regard to the Intergovernmental Agreement. The Treasury advises on the amount to be determined, based on certified payment advices received from Chief Financial Officers of Commonwealth agencies.

## Payments to the States and Territories through the Nation Building Funds

The Nation Building Funds Act 2008 (the Funds Act) outlines the requirements for payments to be authorised from the three Nation - Building Funds (collectively known as 'the Funds'); the responsibilities of Ministers; and the process for channeling payments to recipients through portfolio special accounts.

The Funds were established to provide financing sources to meet the Government's commitment to Australia's future by investment in critical areas of infrastructure.

The three Funds are the:

- Building Australia Fund - for payments in relation to the creation or development of transport, communications, eligible national broadband network matters, energy and water infrastructure;
- Education Investment Fund - for payments in relation to the creation or development of higher education infrastructure, vocational education and training infrastructure, eligible education and research infrastructure; and
- Health and Hospitals Fund - for payments in relation to the creation or development of health infrastructure.

The Treasury receives funds from the relevant portfolio agency and pays the amount to the States. These amounts are recorded as 'COAG receipts from Government Agencies’ to recognise the income and a corresponding grant expense is recognised for the payment to the States.

## Mirror taxes collected by State Governments

On behalf of the States, the Australian Government imposes mirror taxes which replace State taxes in relation to Australian Government places that may be constitutionally invalid. Mirror taxes are collected and retained by the States, under the Commonwealth Places (Mirror Taxes) Act 1998. State Governments bear the administration costs of collecting mirror taxes. Mirror taxes are disclosed at Note 25F.

### 1.27 Administered investments

Administered investments were assessed for impairment at 30 June 2009. No indicators of impairment were noted.

## Development banks

Investments in development banks are classified as non-monetary assets and owing to their nature, these investments are not revalued. As such, these investments are recognised at historical cost where the information is available. Where historical cost records are not readily available, a notional cost has been established at 30 June 1993 by reference to the development banks' financial statements and exchange rates at that time.

Initial investments in the Asian Development Bank (prior to 1995), the International Finance Corporation (prior to 1991) and the International Bank for Reconstruction and Development (prior to 1988) have been recognised at notional cost. Any subsequent capital subscriptions to these development banks have been recognised at historical cost.

Investments in the European Bank for Reconstruction and Development and the Multilateral Investment Guarantee Agency are recognised at historical cost.

## International Monetary Fund

The quota is the current value in Australian dollars of Australia's subscription to the IMF.
The SDR allocation liability reflects the current value in Australian dollars of the Treasury's liability to repay to the IMF Australia's cumulative allocations of SDR. This is classified as 'other payables'.

## Australian Government entities

Administered investments in controlled entities are not consolidated because their consolidation is relevant only at the whole of government level.

The Australian Government's investment in controlled entities and companies in the Treasury portfolio are measured at their fair value as at 30 June 2009. Fair value has been taken to be the net assets of the entities as at balance date. These entities are listed below:

- Reserve Bank of Australia; and
- Australian Reinsurance Pool Corporation.

### 1.28 Promissory notes

Promissory notes have been issued to the IMF, the European Bank for Reconstruction and Development, the International Bank for Reconstruction and Development, the Asian Development Bank and the Multilateral Investment Guarantee Agency.

Where promissory notes have been issued in foreign currencies, they are recorded at their nominal value by translating them at the spot rate at balance date. The promissory notes are non-interest bearing and relate to the undrawn paid-in capital subscriptions.

Foreign currency gains and losses are recognised where applicable.

### 1.29 Mortgage insurance policies written by the Housing Loans Insurance Corporation up to 12 December 1997

The Australian Government sold HLIC on 12 December 1997. Under the terms and conditions of the sale the Australian Government retained ownership of all mortgage insurance policies written up to the time of the sale.

Accounting policies adopted are:

## Premiums

Premiums comprise amounts charged to the policy holder or other insurer, excluding amounts collected on behalf of third parties, principally stamp duties. The earned portion of premiums received and receivable is recognised as revenue. Premiums are treated as earned from the date of attachment of risk.

Premiums received in respect of insured loans are apportioned over a number of years in accordance with an actuarial determination of the pattern of risk in relation to the loans. Premium amounts carried forward in this way are credited to 'provision for unearned premiums'.

Given the maturity of the portfolio, the provision for unearned premiums is now zero.

## Recoveries

Claims incurred recoveries and a receivable for outstanding recoveries are recognised in respect of insurance policies. The asset (HLIC premiums receivable) has been recognised in Note 18, based on the estimated discounted future cash flows.

## Claims

Claims incurred expenses and a liability for outstanding claims are recognised in respect of insurance policies. The liability covers claims incurred but not yet paid, incurred but not yet reported and the anticipated direct and indirect costs of settling those claims. The liability has been recognised based on the estimated discounted future cash flows. Given the maturity of the portfolio, the liability is now estimated to be negligible.

## Acquisition costs

A portion of acquisition costs relating to unearned premium revenue is deferred in recognition that it represents future benefits. Deferred acquisition costs are amortised on an actuarial basis over the reporting periods expected to benefit from the expenditure. Since the provision for unearned premium is now zero, the deferred acquisition cost asset is also now zero.

### 1.30 Provisions and contingent liabilities

HIH Claims Support Scheme liability
The HIH Claims Support Scheme (the Scheme) was established by the Australian Government following the collapse of the HIH Group of companies in March 2001. The purpose of the Scheme was to provide financial assistance to eligible HIH policy-holders affected by collapse of the group. Initial funding of $\$ 640$ million was provided by special appropriation through the Appropriation (HIH Assistance) Act 2001.

HIH Claims Support Limited was established by the Insurance Council of Australia as a not-for-profit company in May 2001 to manage claims made under the Scheme and to operate the HIH Claims Support Trust on behalf of the Australian Government. As the sole beneficiary of the trust the Australian Government is entitled to any residual balance of the trust.

Since 2001, a total of 10,900 claims have been granted eligibility for assistance. Each year an actuarial review of the claims portfolio has been conducted to assess the development
of claims reserves and to estimate the overall liability associated with the Scheme portfolio. In 2006, approval was sought and obtained to increase the Scheme appropriation to a total of $\$ 861$ million to meet the estimated cost of the Scheme portfolio. This additional funding was provided through annual appropriations.

The Australian Government Actuary has continued to review the portfolio annually to reassess the estimated Scheme liability in future years. The most recent review has indicated that the overall cost of the Scheme is estimated to be $\$ 739.1$ million in discounted terms. This amount incorporates an allowance for future inflation and covers the expected cost of past and future claim payments and associated expenses of managing the Scheme.

### 1.31 Administered financial instruments

AASB 139 requires financial instruments to be classified into one of four categories. The financial instruments specific to the Treasury's administered items are classified in three of the four categories as follows:

- Loans and receivables (these are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market);
- IMF related moneys receivable (measured initially at fair value and then measured at amortised cost using the effective interest rate method); and
- Guarantee Scheme for Large Deposits and Wholesale Funding contractual fee receivable (measured initially at fair value and then measured at amortised cost using the effective interest rate method).
- Available-for-sale financial assets;
- investments in development banks (measured at cost); and
- IMF quota (measured at cost).
- Financial liabilities;
- SDR allocation (measured initially at fair value and then measured at amortised cost using the effective interest rate method);
- promissory notes (measured initially at fair value and then measured at amortised cost using the effective interest rate method);
- IMF related monies payable (measured initially at fair value and then measured at amortised cost using the effective interest rate method); and
- Guarantee Scheme for Large Deposits and Wholesale Funding contractual guarantee service obligation (measured initially at fair value and then measured at amortised cost using the effective interest rate method).

Available-for-sale financial assets are those non-derivative financial assets that are designated as available for sale or that are not classified as (a) loans and receivables, (b) held-to-maturity investments or (c) financial assets at fair value through profit or loss.

Although a number of the Treasury's financial instruments are classified as 'available-for-sale', due to their unique nature they do not have a quoted market price in an active market and their fair value cannot be reliably measured at the reporting date. These items are valued at cost. The Treasury does not hold these instruments for the purposes of trading.

Promissory notes are financial liabilities that are required to be measured at amortised cost using the effective interest rate method. The contractual terms of the promissory notes are non-interest bearing making the effective interest rate zero. Therefore, the measurement would be the initial value less any repayments plus or minus movements in exchange rates as a result of translation on the balance date.

The Guarantee Scheme for Large Deposits and Wholesale Funding contractual fee receivable represents the requirement under AASB 139 for the Treasury to recognise up-front, its entitlements under the financial guarantee contract to revenue received or receivable from authorised deposit-taking institutions over the contracted guarantee period. Conversely, the Treasury is required to recognise a corresponding initial liability for its contractual obligation to provide a guarantee service over the period covered by each guarantee contract (analogous to unearned income).

Recognition of these amounts only relates to fee revenue aspects of the financial guarantee contracts. These amounts do not reflect any expected liability under the Guarantee Scheme itself as these are considered remote and unquantifiable. Contingent liabilities and assets are disclosed at Note 21.

Administered financial instruments are accounted for in accordance with the accounting policies detailed above.

Administered financial instruments are disclosed at Note 23.

## Note 2: Events occurring after reporting date

## RBA Dividend

The RBA has calculated a dividend of $\$ 5.977$ billion in respect of its results for the year ended 30 June 2009 ( $\$ 1.403$ billion in 2007-08). The Treasurer has determined that payment to the Government will be in two tranches: $\$ 5.227$ billion in 2009-10 and the balance of $\$ 750$ million in 2010-11. As a consequence, the Treasury will record this dividend income and a dividend receivable in its accounts for the year ended 30 June 2010 in accordance with its accounting policy (Note 1.24).

## Nation Building - Specific purpose payments

As at 1 July 2009 the Treasury assumed responsibility for the payment of Nation Building specific purpose payments which were previously paid by the Department of Infrastructure, Regional Development and Local Government. The impact of the change will be the requirement for the Treasury to recognise a prepayment asset in its balance sheet of $\$ 247.148$ million and to recognise any grant payments made during the financial year in the income statement. The Treasury will also report the associated administered commitment items in the 2009-10 financial year.

## OzCar special purpose vehicle

The Australian Government will guarantee all non AAA-rated securities issued by the OzCar special purpose vehicle to facilitate the purchase of those securities by Australia's four major domestic banks. Legislation to provide an appropriation to support the Australian Government guarantee of those securities received Royal Assent on 6 July 2009.

## Australian Government Guarantee of State and Territory Borrowing

The Australian Government Guarantee of State and Territory Borrowing formally commenced on 24 July 2009. Under the Guarantee, state and territory governments can apply for a guarantee over new and existing securities. Legislation to provide an appropriation to support the Australian Government guarantee of those securities received Royal Assent on 29 June 2009.

## IMF SDR allocation

An allocation by the IMF of SDRs equivalent to US\$250 billion was supported by G-20 leaders and the International Monetary and Financial Committee in April 2009. The allocation was formally agreed by the IMF Board of Governors on 7 August 2009 and allocated to IMF members on 28 August 2009. Australia's share equated to AUD $\$ 4.454$ billion.

[^4]Note 8: Interest bearing liabilities

|  | $\begin{array}{r} 2009 \\ \$ ' 000 \end{array}$ | $\begin{array}{r} 2008 \\ \$ ' 000 \end{array}$ |
| :---: | :---: | :---: |
| Note 8: Leases |  |  |
| Finance leases: | 233 | 890 |
| P ayable: |  |  |
| W ithin one year |  |  |
| Minimum lease payments | 201 | 739 |
| Deduct: future finance charges | (8) | (44) |
| Total leases payable within one year | 193 | 695 |
| In one to five years |  |  |
| Minimum lease payments | 41 | 202 |
| Deduct: future finance charges | (1) | (7) |
| Total leases payable within one year to five years | 40 | 195 |
| Finance leases recognised on the balance sheet | 233 | 890 |

Note: Finance leases exist in relation to certain major office equipment assets. The leases are non-cancellable and for fixed terms averaging 2.75 years, with a maximum of 3.25 years. The interest rate implicit in the leases averaged 6.24 per cent (2008: 7.11 per cent). The Treasury guarantees the residual values of all assets leased. There are no contingent rentals.

## Note 9: Provisions

|  | $2009$ | $\begin{array}{r} 2008 \\ \$ ' 000 \end{array}$ |
| :---: | :---: | :---: |
| Note 9: Employee provisions |  |  |
| Salaries and wages | 1,374 | 886 |
| Leave | 35,976 | 33,517 |
| Superannuation | 256 | 176 |
| Aggregate employee benefit liability | 37,606 | 34,579 |
| Other employee entitlements | 81 | 117 |
| Aggregate employee benefit liability |  |  |
| and related on-costs | 37,687 | 34,696 |
| Current | 33,943 | 25,455 |
| Non-current | 3,744 | 9,241 |
| Aggregate employee benefit liability and related on-costs | 37,687 | 34,696 |

Note: All other entitlements are current liabilities. The classification of current includes amounts for which there is not an unconditional right to defer settlement by one year, hence in the case of employee provisions, the above classification does not represent the amount expected to be settled within one year of the reporting date. Employee provisions expected to be settled in twelve months from the reporting date is $\$ 11,584,936$ (2008: \$18,641,361), in excess of one year \$26,101,756 (2008: \$16,053,841).

## Note 10: Cash flow reconciliation

|  | 2009 | 2008 |
| :---: | :---: | :---: |
|  | \$'000 | \$'000 |
| Reconciliation of cash and cash equivalents as per balance sheet to cash flow statement |  |  |
| Report cash and cash equivalents as per |  |  |
| Cash flow statement | 1,367 | 2,270 |
| Balance sheet | 1,367 | 2,270 |
| Reconciliation of operating result to net cash from operating activities |  |  |
| Operating result | $(3,869)$ | 8,490 |
| Depreciation/amortisation | 4,191 | 3,344 |
| Loss on disposal of non-current assets | 9 | 20 |
| Net write down of non-financial assets | 33 | 47 |
| (Increase)/decrease in net receivables | $(3,323)$ | $(18,752)$ |
| (Increase)/decrease in other non financial assets | 401 | (574) |
| Increase/(decrease) in provisions | 2,992 | 1,905 |
| Increase/(decrease) in other payables | 893 | 125 |
| Increase/(decrease) in supplier payables | 1,064 | 1,221 |
| Net cash from/(used by) operating activities | 2,391 | $(4,174)$ |

## Note 11: Contingent liabilities and assets

## Quantifiable contingencies

The schedule of contingencies reports other liabilities of $\$ 248,224$ (2008: $\$ 254,606)$. This amount represents an estimate of the Treasury's liability in respect of studies assistance.

## Unquantifiable contingencies

As at 30 June 2009, the Treasury had a number of legal claims against it. The Treasury has denied liability and is defending the claims. It is not possible to estimate the amounts of any eventual payments that may be required in relation to these claims.

The courts may award legal costs against the Treasury in the event it is unsuccessful in an action before the courts. As there is uncertainty over the outcome of outstanding and pending court cases, duration of court cases and the legal costs of the opposing party, these costs cannot be reliably measured.

## Remote contingencies

The Treasury's lease on its current premises contains a make good clause which has been estimated by an independent valuer at $\$ 1.3$ million. The Treasury received an external assessment on the likelihood of this being required and has deemed it as remote.

As at 30 June 2009, the Treasury has a number of contracts which may give rise to a contingent liability based on certain events occurring. The Treasury has assessed the likelihood of such events happening as being remote and unquantifiable.

## Note 12: Executive remuneration

Total remuneration includes salary, allowances, employer superannuation, leave accrued during the period, vehicle costs and fringe benefits tax.

|  | 2009 | 2008 |
| :---: | :---: | :---: |
| The number of executives who received or were due to receive total remuneration of $\$ \mathbf{1 3 0 , 0 0 0}$ or more: |  |  |
| \$130,000 to \$144,999 | 2 | 2 |
| \$145,000 to \$159,999 | 2 | 1 |
| \$160,000 to \$174,999 | 2 | 4 |
| \$175,000 to \$189,999 | 2 | 11 |

| Financial liabilities |  |  |
| Liabilities at amortised cost |  |  |
| F inance leases | 233 | 890 |
| Payables - suppliers | 3,853 | 2,789 |
| Other payables | 3,753 | 3,118 |
| Carrying amount of financial liabilities | 7,839 | 6,797 |

Note: Implicit interest rate on finance leases for 2009 is 6.24 per cent (2008: 7.11 per cent).

Note 15B: Net income and expense from financial liabilities

|  | 2009 | 2008 |
| :--- | ---: | ---: |
| Liabilities at amortised cost | $\$ \mathbf{0 0 0}$ | $\$ ' 000$ |
| Interest expense |  |  |
| Net gain/(loss) financial liabilities - at amortised cost | (94) | (93) |
| Net gain/(loss) from financial liabilities | $(94)$ | $(93)$ |

## Note 15: Financial instruments (continued)

## Note 15C: Net fair values of financial assets and liabilities

The net fair values of cash and non-interest bearing monetary financial assets approximate their carrying amounts.

The net fair values of the finance leases are based on discounted cash flows using current interest rates for liabilities with similar risk profiles. The Treasury enters into finance lease arrangements in relation to certain major office equipment assets. The leases are non-cancellable and for fixed terms averaging 2.75 years, with a maximum of 3.25 years. The Treasury guarantees the residual values of all assets leased and there are no contingent rentals.

The net fair values for trade creditors and other liabilities are approximated by their carrying amounts.

## Note 15D: Credit risk exposures

The Treasury is exposed to minimal credit risk as loans and receivables are cash and trade receivables. The maximum exposure to credit risk is the risk that arises from potential default of a debtor. This amount is equal to the total amount of trade receivables (2009: $\$ 3,014,090$ and 2008: $\$ 2,864,668$ ). The Treasury has assessed the risk of default on payment as being minimal.

Other government agencies and staff members make up the majority of the Treasury's debtors. To aid the Treasury to manage its credit risk there are internal policies and procedures that guide employees on debt recovery techniques that are to be applied.

The Treasury holds no collateral to mitigate against credit risk.

|  |  |  | 25 | 354 |  |

## Note 15E: Liquidity risk

The Treasury's financial liabilities are payables and finance leases. The exposure to liquidity risk is based on the notion that the Treasury will encounter difficulty in meeting its obligations associated with financial liabilities. This is highly unlikely due to the appropriation funding mechanisms available to the Treasury and internal policies and procedures put in place to ensure there are appropriate resources to meet its financial obligations.

The Treasury is appropriated funding from the Australian Government. The Treasury manages its budgeted funds to ensure it has adequate funds to meet payments as they fall due. In addition, the Treasury has policies in place to ensure timely payments are made when due and has no past experience of default.

| Total | - | 6,595 | 202 | - | 6,797 |

## Note 15F: Market risk

The Treasury holds only basic financial instruments that do not expose the department to certain market risks.

The only interest-bearing items on the balance sheet are finance leases. All finance leases entered into bear interest at a fixed interest rate and will not fluctuate due to changes in the market interest rate. Current implicit interest rate is 6.24 per cent (2008: 7.11 per cent).

## Note 21: Administered contingent liabilities and assets Quantifiable administered contingencies

Quantifiable administered contingencies that are not remote are disclosed in the schedule of administered items as quantifiable administered contingencies.

## Unquantifiable administered contingencies

## Contingent loss <br> Housing Loans Insurance Corporation - guarantee

The Australian Government sold HLIC on 12 December 1997 and has assumed all residual contingencies. The contingent liability relates to the HLIC's contracts of mortgage insurance and any borrowings approved by the Treasurer up to the time of sale. The principal amount covered by the guarantee and the balances outstanding are unable to be reliably measured.

## Terrorism insurance - Australian Reinsurance Pool Corporation (ARPC)

The Terrorism Insurance Act 2003 established a scheme for replacement terrorism insurance covering damage to commercial property including associated business interruption and public liability. The ARPC uses reinsurance premiums paid by insurers to meet its administrative expenses and to build a reserve for claims and purchase retrocession to help meet future claims. The Australian Government guarantees to pay any liabilities of the ARPC above the reserve for claims and retrocession placed by the ARPC, but the Treasurer must declare a reduced payout rate to insured parties if the Australian Government's liability would otherwise exceed $\$ 10$ billion.

## Contingent gain <br> HIH Claims Support Scheme

As the beneficiary of the HIH Claims Support Trust, the Australian Government is entitled to the residual balance of the Trust, after the collection of recoveries. Due to the inherent uncertainty of future recoveries, it is not possible to quantify these amounts accurately. During 2008-09 the Treasury received distributions from the Trust, however, the amount and timing of future recoveries and subsequent distributions are unknown.

```
International Monetary Fund (IMF)
```

Since 1986, the IMF has used its burden sharing mechanism to make up for the loss of income from unpaid interest charges on the loans of debtor members and to accumulate precautionary balances in a Special Contingent Account to guard against the ultimate failure of debtor members to settle their overdue principal obligations to the IMF.

The mechanism works by providing for additions to the rate of charge on IMF loans and deductions to the rate of remuneration for creditor members such as Australia. Resources collected from individual members under the burden sharing mechanism are refundable to them as arrears cases are resolved, or as may be decided by the IMF. Thus, resources collected for unpaid charges are refunded when these charges are eventually settled.

## Note 21: Administered contingent liabilities and assets (continued)

Likewise, precautionary balances held in the Special Contingent Account would be distributed back to members in proportion to their cumulative contributions when there are no overdue charges or principal balances. The IMF could also decide to make an early distribution.

As there is considerable and inherent uncertainty around the timing and amounts of burden sharing to be refunded to Australia this contingent asset cannot be reliably measured and as such is recorded as an unquantifiable contingent asset.

## Remote administered contingencies

## Guarantees

The following borrowings have been guaranteed by the Australian Government within the Treasury portfolio:

1 Under the terms of the Commonwealth Bank Sale Act 1995, the Australian Government has guaranteed various liabilities of the Commonwealth Bank of Australia (CBA), and the Commonwealth Bank Officers' Superannuation Corporation (CBOSC). The guarantee for the CBA relates to both on and off balance sheet liabilities. The guarantee of the CBOSC covers the due payments of any amount that is payable to or from Officers' of the Superannuation Fund (the Fund), by CBOSC or by CBA, in respect of a person who was a member, retired member or beneficiary of the Fund immediately before 19 July 1996. The guarantee of the CBA and CBOSC reflected in the above table is the value at 31 March 2009 and 31 December 2008 respectively.
2 The contingent liability for the RBA, relates to the Australian Government's guarantee of the liabilities of the RBA. It is measured as the Bank's total liabilities excluding capital, reserves and Australian Government deposits. The major component of the Bank's liabilities are notes (that is, currency) on issue. As at 30 June 2009, notes on issue totalled $\$ 48.96$ billion.

## Note 21: Administered contingent liabilities and assets (continued) <br> Financial Claims Scheme

The Australian Government has established a Financial Claims Scheme to provide depositors of authorised deposit-taking institutions and general insurance policyholders with timely access to their funds in the unlikely event of a financial institution failure.

The Early Access Facility for Depositors established under the Banking Act 1959 provides a mechanism for making payments to depositors under the Government's guarantee of deposits in authorised deposit-taking institutions.

From 12 October 2008 deposits up to $\$ 1$ million at eligible authorised deposit-taking institutions are eligible for coverage under the Financial Claims Scheme. The $\$ 1$ million cap is temporary and will be reviewed after three years.

The expected liability for deposits under the Financial Claims Scheme is remote and unquantifiable. Australia's financial system is considered among the strongest and best regulated in the world. Authorised deposit-taking institutions are subject to prudential regulation by the Australian Prudential Regulation Authority (APRA) in accordance with international standards, which are designed to ensure that financial institutions have the capacity to meet their financial promises. This framework requires institutions to be adequately capitalised and have appropriate risk management systems in place. Furthermore, Australia's four major banks (which hold the majority of government guaranteed deposits) are among only eight large banks globally rated AA or higher.

Government expenditure would arise under the guarantee only in the unlikely event that an institution failed to meet its obligations with respect to a commitment that was subject to the guarantee and the guarantee was called upon. In such a case, the Government would likely be able to recover any such expenditure through a claim on the relevant institution. The impact on the Government's budget would depend on the extent of the institution's default and its ability to meet the Government's claim. If there were a shortfall, a levy would be applied to industry to recover the difference between the amount expended and the amount recovered in the liquidation.

As at 30 June 2009, deposits eligible for coverage under the Financial Claims Scheme were estimated to be approximately $\$ 660$ billion.

The Policyholder Compensation Facility established under the Insurance Act 1973 provides a mechanism for making payments to eligible beneficiaries with a valid claim against a failed general insurer. Amounts available to meet payments and administer this facility, in the event of activation, are capped at $\$ 20.1$ billion under the legislation.

The expected liability under the Policyholder Compensation Facility is remote and unquantifiable. The likelihood of a collapse that requires the activation of the scheme is low and the payments made under the scheme would be likely to be recovered through the liquidation of the failed institution.

## Note 21: Administered contingent liabilities and assets (continued)

If there were a shortfall, a levy would be applied to industry to recover the difference between the amount expended and the amount recovered in the liquidation.

APRA is responsible for the administration of the Financial Claims Scheme. In the unlikely event that payments would be required under the Financial Claims Scheme any payments to eligible depositors or general insurance policyholders will be made out of APRA's Financial Claims Scheme Special Account.

Guarantee of large deposits in authorised deposit-taking institutions
The Australian Government has guaranteed eligible deposits in authorised deposit-taking institutions from 12 October 2008.

Deposits over \$1 million, and eligible deposits at foreign bank branches, are eligible for coverage under the Guarantee Scheme for Large Deposits and Wholesale Funding for a fee. Deposits up to $\$ 1$ million are eligible for coverage under the Financial Claims Scheme (see above). The large deposit guarantee is a temporary measure in light of the global financial crisis.

The expected liability for deposits under the guarantee scheme is remote and unquantifiable. Australia's financial system is considered among the strongest and best regulated in the world. Authorised deposit-taking institutions are subject to prudential regulation by APRA in accordance with international standards, which are designed to ensure that financial institutions have the capacity to meet their financial promises. This framework requires institutions to be adequately capitalised and have appropriate risk management systems in place. Furthermore, Australia's four major banks (which hold the majority of government guaranteed deposits) are among only eight large banks globally rated AA or higher.

Government expenditure would arise under the large deposit guarantee only in the unlikely event that an institution failed to meet its obligations with respect to a commitment that was subject to the guarantee and the guarantee was called upon. In such a case, the Government would likely be able to recover any such expenditure through a claim on the relevant institution. The impact on the Government's budget would depend on the extent of the institution's default and its ability to meet the Government's claim.

As at 30 June 2009, authorised deposit-taking institutions' deposits covered by this guarantee were estimated at $\$ 23.3$ billion.

Guarantee of wholesale funding of authorised deposit-taking institutions
The Australian Government has guaranteed eligible wholesale funding of authorised deposit-taking institutions from 12 October 2008. The guarantee facility will be withdrawn when market conditions normalise.

## Note 21: Administered contingent liabilities and assets (continued)

The expected liability under this guarantee is remote and unquantifiable. Australia's financial system is considered among the strongest and best regulated in the world. Authorised deposit-taking institutions are subject to prudential regulation by APRA in accordance with international standards, which are designed to ensure that financial institutions have the capacity to meet their financial promises. This framework requires institutions to be adequately capitalised and have appropriate risk management systems in place. Furthermore, Australia's four major banks (which hold the majority of government guaranteed wholesale funding) are among only eight large banks globally rated AA or higher.

Government expenditure would arise under the guarantee only in the unlikely event that an institution failed to meet its obligations with respect to a commitment that was subject to the guarantee and the guarantee was called upon. In such a case, the Government would likely be able to recover any such expenditure through a claim on the relevant institution. The impact on the Government's budget would depend on the extent of the institution's default and its ability to meet the Government's claim.

As at 30 June 2009, authorised deposit-taking institutions' wholesale funding covered by this guarantee was estimated at $\$ 116.6$ billion.

## Grants to States and Territories

As the Treasury has responsibility for all payments to the States and Territories under the Federal Financial Relations Framework there may exist a contingent liability which is remote and unquantifiable in relation to some agreements between the relevant agency with policy responsibility and the States and Territories. Whilst Treasury does not bear the risk of the contingent event, the resultant payment would be made by the Treasury under the Federal Financial Relations Framework.

## Note 22: Administered investments

The principal activities of each of the Treasury's administered investments are as follows:

## Development Banks

The European Bank for Reconstruction and Development (EBRD) was established in 1991 to assist post-communist, democratic, Eastern European Countries develop their private sector and capital markets. It provides project financing for banks, industries and businesses, both new ventures and investments in existing companies. It also works with publicly owned companies, to support privatisation, restructuring state-owned firms and improvement of municipal services. The EBRD uses its close relationship with governments in the region to promote policies that will bolster the business environment.

## Note 22: Administered investments (continued)

The Asian Development Bank (ADB) was established in 1966 and has a mandate to reduce poverty and promote general development in its developing member countries. The ADB does this by financing (through a mix of loans, grants, guarantees and co-financing activities with both other donors and the private sector) public sector and private sector activities. It also provides technical assistance to developing member countries so they can improve their policy and business investment environments. A significant portion of the ADB's activities are focused in the infrastructure and energy sectors.

The World Bank was established in 1944 and comprises the International Bank for Reconstruction and Development (IBRD), the International Development Association (IDA), the International Finance Corporation (IFC) and the Multilateral Investment Guarantee Agency (MIGA). The IBRD provides financing and technical assistance to Middle Income Countries and lends on harder terms than the IDA, which provides concessionary finance and technical assistance to low income countries. The IFC supports the development of the private sector by providing direct finance to private sector operations. MIGA provides guarantee services for projects, which reduce the risks for other co-financing partners including the private sector.

## International Monetary Fund (IMF)

The IMF is an organisation of 185 countries, working to foster global monetary cooperation, secure financial stability, facilitate international trade, promote high employment and sustainable economic growth, and reduce poverty. It undertakes surveillance and annual economic assessments, provides technical assistance to developing countries and provides short term loans to countries experiencing currency and financial crisis.

## Australian Government entities

The Australian Government's investment in controlled entities and companies in the Treasury portfolio are measured at their fair value. Fair value has been taken to be the net assets of the entities as at balance date.

| Net gain/(loss) from financial liabilities | $(125,191)$ | 20,185 |

## Note 23D: Net fair value of financial assets and liabilities

The net fair values of the Treasury's administered financial instruments are equal to the carrying amount and are not required to be disclosed in a separate table.

## Note 23E: Credit risk exposure

The maximum exposure to credit risk of the Treasury's administered financial assets is the carrying amount of 'loans and receivables' (2009: $\$ 2,753,106,000$ and 2008: \$11,569,000) and the carrying amount of 'available for sale financial assets' (2009: \$6,894,196,000 and 2008: $\$ 6,190,631,000$ ). However, the international financial institutions that the Treasury holds its financial assets with hold a minimum of AA credit ratings. The contractual fee receivable arising from the Guarantee Scheme for Large Deposits and Wholesale Funding that the Treasury holds relates only to prudentially regulated authorised deposit-taking institutions and the majority of the contractual fee receivable comprises of AA-rated authorised deposit-taking institutions. Therefore the Treasury does not consider any of its financial assets to be at risk of default.
Note 23: Administered financial instruments (continued)

## Note 23F: Liquidity risk

The Treasury's administered financial liabilities are promissory notes, grant liability, the IMF SDR allocation and HIH and HLIC provisions. The contractual guarantee service obligation arising from the Guarantee Scheme for Large Deposits and Wholesale Funding is not included as there is no liquidity risk associated with this item. It is contingent on the value of the associated contractual fee receivable. The exposure to liquidity risk is based on the notion that the Treasury will encounter difficulty in meeting its obligations associated with administered financial liabilities. This is highly unlikely due to appropriation funding through special appropriations and non-lapsing capital appropriations as well as internal policies and procedures put in place to ensure there are appropriate resources for the Treasury to meet its financial obligations. The following tables illustrate the maturities for financial liabilities:

|  | $\begin{array}{r} \text { On demand } \\ 2009 \\ \$ 000 \\ \hline \end{array}$ | $\begin{array}{r} \text { Within } 1 \text { year } \\ 2009 \\ \$ ' 000 \end{array}$ | 1 to 5 years 2009 <br> \$'000 | $\begin{array}{r} \hline>5 \text { years } \\ 2009 \\ \$ \prime 000 \end{array}$ | $\begin{gathered} \text { Total } \\ 2009 \\ \$ ' 000 \end{gathered}$ |

## Note 23: Administered financial instruments (continued)

Note 23G: Market risk
Foreign currency risk refers to the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Treasury is exposed to foreign exchange currency risk primarily through undertaking certain transactions denominated in foreign currency.

The Treasury is exposed to foreign currency denominated in USD, EUR and SDR.
The following table details the effect on the profit and equity as at 30 June 2009 from a 10 per cent favourable/unfavourable change in AUD against the USD, EUR and SDR with all other variables held constant.

| Risk variable | Change in risk variable \% | Effect on |  |
| :---: | :---: | :---: | :---: |
|  |  | Profit and loss 2009 $\$ \mathbf{\prime} 000$ | $\begin{gathered} \hline \text { Equity } \\ 2009 \\ \$ ' 000 \end{gathered}$ |
| IMF related moneys owing | 10.00\% | (48) | (48) |
| IMF related moneys owing | -10.00\% | 59 | 59 |
| Quota | 10.00\% | $(562,129)$ | $(562,129)$ |
| Quota | -10.00\% | 687,046 | 687,046 |
| Promissory notes | 10.00\% | 4,975 | 4,975 |
| Promissory notes | -10.00\% | $(6,081)$ | $(6,081)$ |
| IMF allocation liability | 10.00\% | 81,729 | 81,729 |
| IMF allocation liability | -10.00\% | $(99,891)$ | $(99,891)$ |
| Other liabilities | 10.00\% | 59 | 59 |
| Other liabilities | -10.00\% | (72) | (72) |
|  |  |  |  |
|  | Change | Effec |  |
|  | in risk | Profit and loss | Equity |
|  | variable | 2008 | 2008 |
| Risk variable | \% | \$'000 | \$'000 |
| IMF related moneys owing | 10.00\% | (54) | (54) |
| IMF related moneys owing | -10.00\% | 66 | 66 |
| Quota | 10.00\% | $(498,168)$ | $(498,168)$ |
| Quota | -10.00\% | 608,872 | 608,872 |
| Promissory notes | 10.00\% | 4,244 | 4,244 |
| Promissory notes | -10.00\% | $(5,187)$ | $(5,187)$ |
| IMF allocation liability | 10.00\% | 72,429 | 72,429 |
| IMF allocation liability | -10.00\% | $(88,525)$ | $(88,525)$ |
| Other liabilities | 10.00\% | 357 | 357 |
| Other liabilities | -10.00\% | (437) | (437) |

Shares in international financial institutions are valued at cost and as such their fair value is not altered by exchange rates.

## Note 23: Administered financial instruments (continued)

Note 23G: Market risk (continued)
The sensitivity analysis of the Treasury's exposure to foreign currency risk at the reporting date has been determined based on the Department of Finance and Deregulation's calculated average of the five main currencies for which the Australian Government is exposed. USD, EUR, GBP, JPY and NZD. For each of the five currencies an average of the past five years annual standard deviation is used, then calculated from observed daily movement of the AUD. Three standard deviations were selected as a 'reasonably' possible change as it accommodates for 99 per cent of the variation in the movement of historical foreign exchange rates.

The Guarantee Scheme for Large Deposits and Wholesale Funding contractual obligation liability represents Treasury's obligation to provide a guarantee service to authorised deposit-taking institutions. The liability will always be equal to the value of the Guarantee Scheme for Large Deposits and Wholesale Funding contractual fee receivable.

## Note 25: Appropriations (continued)

Note 25F: Acquittal of authority to draw cash from the consolidated revenue fund special appropriations (other disclosures) (continued)

The disclosure below is for note purposes only and is not recognised in the financial statements.

## Commonwealth Places (Mirror Taxes) Act 1998

The Treasury is responsible for administering the above Act for the purpose of paying compensation to the States in respect of constitutionally invalid States taxes levied on Commonwealth places. Under the Act, the Australian Government is liable to pay to a State amounts equal to amounts received by the Australian Government (including amounts received by a State on behalf of the Australian Government) under an applied law of the State. During the current reporting period and previous reporting period the States collected and provided the following estimates of taxes pursuant to the Act:

|  | $\mathbf{2 0 0 9}$ | 2008 |

## Note 25: Appropriations (continued)

Note 25G: Special accounts (continued)

## Services for other Governments and non agency bodies account (Departmental)

The Treasury has a 'Services for other Governments and non-agency bodies special account' established under section 20 of the Financial Management and Accountability Act 1997 (FMA Act). The purpose of this special account is for the expenditure in connection with services performed on behalf of other Governments and bodies that are not agencies under the FMA Act. For the years ended 30 June 2008 and 30 June 2009 this special account had nil balances and no transactions were credited or debited to the account.

## Other trust moneys account (Departmental — Special Public Money)

The Treasury has an 'Other trust moneys special account' established under section 20 of the FMA Act. The purpose of this special account is for expenditure of monies temporarily held on trust or otherwise for the benefit of a person other than the Australian Government. Any money held is thus special public money under section 16 of the FMA Act. For the years ended 30 June 2008 and 30 June 2009 this special account had nil balances and no transactions were credited or debited to the account.

## Other trust moneys account (Administered — Special Public Money)

The Treasury has an 'Other trust moneys special account' established under section 20 of the FMA Act. The purpose of this special account is for expenditure of monies temporarily held on trust or otherwise for the benefit of a person other than the Australian Government. Any money held is thus special public money under section 16 of the FMA Act.

For the years ended 30 June 2008 and 30 June 2009 this special account held monies in relation to HIH recoveries received from the HIH Claims Manager, which were recovered from third parties in relation to claims made by persons insured by HIH. These recoveries comprise a portion which is due to third parties (non-Australian Government) and part to the Australian Government. Receipts and subsequent payments relating to third parties (non-Australian Government) are treated as special public monies.

## Note 25: Appropriations (continued)

## Note 25H: Special accounts investment of public money

For the periods 2007-08 and 2008-09, the Treasury has not used section 39 of the FMA Act or section 18 and 19 of the Commonwealth Authorities and Companies Act in respect of this special account.

## Note 26: Compensation and debt relief

For the periods of 2007-08 and 2008-09, the Treasury made no administered or departmental act of grace, ex-gratia or section 73 of the Public Service Act 1999 payments.

## Note 27: Reporting of outcomes

The Treasury uses a process of cost allocation to estimate the allocation of shared costs. The cost of each output is comprised of direct and indirect costs. Direct costs are assigned to outputs according to detailed cost profiles. Indirect costs that comprise corporate and overhead items such as information technology, accommodation and human resource management are allocated to outputs based on a (cost driver) consumption basis. This basis of allocation is consistent with the basis used for previous years.

[^0]:    This statement should be read in conjunction with the accompanying notes.

[^1]:    This statement should be read in conjunction with the accompanying notes.

[^2]:    This schedule should be read in conjunction with the accompanying notes.
    Note: Administered unquantifiable contingencies are disclosed in Note 21: Administered contingent liabilities and assets. The Treasury has given financial
    guarantees which are disclosed at Note 1.31 and Note 23: Administered financial instruments.

[^3]:    All revaluations are independent and are conducted in accordance with the revaluation policy stated at Note 1.17.

[^4]:    Note: Settlement is usually made net 30 days.

[^5]:    1 HLIC claims expenses includes an actuarial adjustment decreasing provision for insurance claims resulting in an offsetting negative expense.

[^6]:    1 From 1 July 2008 the Australian Accounting Standards Board and Auditing and Assurance Standards Board became prescribed agencies under the Financial Management and Accountability Act, hence the net asset position of these agencies was derecognised from Treasury's financial statements.
