

Bail-in for Australia - Too big to Fail

With Bail-in we are expected to pay for the losses and expenses but never having the opportunity to share in the profits and rewards or participate in the decision making where where these investments are being placed which have led to these losses.

That is: we get all the pain but none of the gain.

Are we being looked on as just slaves?

The presumption that we need overseas investment is also flawed, Australians have never been given an opportunity to invest in australia.
