

Looking for financial stability for the common good, Better control on Banks and its activities, affecting on individual and households. people savings belongs to people not to banks, VOTE NO to bail-in law. don't use peoples money or assets (earning with big efforts and sacrifice) , to save Banks that gambling with people money in their investment ventures. Australia need a figure as the former 1933 glass-steagall Act for the long term prosperity of the nation. A real nation Bank wich b[put the money to work in benefit of Australia and achievement of long term prosperity and progress..... Real banks investing the money in real works (infrastructure projects) low interest rate for long term projects factories, dams, bridges, trains....Jobs... Jobs.....Jobs...

Final thought: Australian Constitution , Chapter IV also regulates other aspects of finance and trade. Two of the more important provisions are section 81, which provides that all money raised or received by the Executive Government of the Commonwealth is to form one Consolidated Revenue Fund, and section 83, which provides that no money may be expended by the Executive Government of the Commonwealth without the authority of Parliament.

The Parliament must represent the people interest and commonwealth (common welfare)

We don't want more financial crisis!!!! We want to be part f the solution... right choices..... Big solutions.... Think about it Parliament. We are able.... the future is in our hands.  
(Humble opinion)
