

- I would like to pose the protection of bank deposits from high risk speculation under a law similar to the banking act of 1933 in the USA(Glass-Steagall).
- Please do not pass any legislation that will allow banks to confiscate deposits to keep themselves afloat in the case of a financial crisis. For example this bail-in legislation I have been made aware of.
- A return to a system of national credit banking similar to that of the old Commonwealth Bank, lending public credit for the building of our nation. Any profit that is made goes back to the nation.
- Free us and our politicians from the grip of multi-national corporations that loot the wealth and dictate the policy of this nation.
