

In my opinion allowing bail in for TBTF banks would be a huge mistake for the the following reasons:

- 1 The general population will be punished for the mistakes (or mismanagement) of some big business, this should be unconstitutional.
- 2 Some Productive businesses will go bankrupt when they loose even 10% of their investment.
- 3 Councils, Hospital, Charities may fail to keep functioning.

I cannot fathom how the government fails to realize that the bankers are in fact parasites, they do not Produce anything at all and yet they are so powerful that they have governments considering protection for them at the cost of the REAL ECONOMY.

Pleas!! bring back a true National Bank for the People, Business and farmers.
