I have included my submission to the 2nd round of the debate on how to save the (T.B.T.F.) Banks in event of another 2008. G.F.C.

Mark Carney of the F.S.B. stated "Bail In" was in train for Aust. & other Nations at the G 20 in Brisbane, despite Hockey having mouthed support for Bail In at London & Wall St events both he & Abbott denied this only to be exposed as liars by Treasury who supported it, also look at the advisors Carolyn Mason author of the Campbell Report & Melissa Babbage Hockey's wife & adviser both Investment Bankers.

The 4 big Banks + Macquarie have a speculative debt of \$24 - Trillion, we have G.D.P. @ \$1.6 Trillion all unpayable debt

If the leaders & this panel have any moral patriotism you will not give Banks more power to make depositors into creditors, to create another E.V. (Cyprus breeze etc)

Select the Common Good & General Welfare bring back FDR's 1933 Glass Steagall Act, National Credit Banking to regulate not Big Business, Abandon "Bail In" because of its evil Free Market agenda which only brings austerity poverty & genocide as seen in E.V. It is the 100th year anniversary of WWI caused by the same problem as today so for Christ's sake & your own abandon Bail In & Bring back Glass Steagall also read Pope Francis's speeches.
