

# **RESPONSE TO THE PROPOSED BILL**

## **Currency (Restrictions on the Use of Cash) Bill 2019**

My name is Karen Alexander - born in Australia and hold an MBA specialising in Project Management and a Professional Certificate in Wellbeing Coaching and Management. I represent an Australian with proof and validation of the Australian Government, is not to be trusted. There is nothing but greed and suppression of good hard-working Australian people.

The documentation attached may not directly apply to the response you are expecting. But will build up to why I hold such a huge lack of trust in any Australian Authority, and anyone in the senate who pass these bills without long-term thought of the impact on the Australian people and the economy.

Australia will continue to have the economy and share market constrict which will become more clear next year. Yet the government is taking steps to restrict and control the economy with their short-term focus.

**Fewer laws will open the economy not more laws.**

### **Summary and documents attached.**

1. In 2006 they diagnosed me with terminal, incurable cancer, given 3 months to live and we purchased my burial plot. I was relentlessly bullied by medical professionals and repeatedly told I would die when I refused to have chemo and take the drugs they prescribed. One of these, was a drug called Tamoxifen. The scientific data sheet is attached. It was known since the Year 2000 to be a human carcinogen and is still prescribed to this day. My Pet scan attached is to prove that the lies do not come from this Australian, but from the Australian Government who allow these drugs into our country and say they are legal and ethical. The Australian Cancer Council scammed millions from the unsuspecting Australian public, about finding a cure for cancer. They were promoting the drug Tamoxifen recommended in their brochures. A drug scientifically proven to cause liver cancer and yet there have been no repercussions from this fraudulent activity.
2. The document ATTACHMENT 2 relating to this point will show you how my view of the economy and how the corrupt medical system is stealing and defrauding the everyday Australian. Based on my critical analysis of the medical system.
3. My personal experience from a bank after the bank enquiry- sealed the deal. I had my bank accounts frozen for 2 weeks and I had done nothing illegal. The powerlessness felt when this happened concreted for me there is no justice nor compensation when government, banks or anyone in authority is involved. All I got was an apology. My trust has ceased - this event happened after the banking commission. Nothing had changed.
4. I finally refused to pay the Medicare Levy and Private Health Insurance we had been forced to pay over the past 11 years, which had not benefited my health. We had been living under pressure for years paying 1. The Medicare Levy 2. The Private Health Insurance 3. Buying products and items which actually have healed and kept me alive. The ATO ruled I had to

separate from my husband. We had been married for 35 years. I fight for the freedom to choose my own healthcare and not one that is imposed on me by the government selling synthetic drugs.

5. I know the TGA makes about \$250k for every new drug brought and registered in this country. Hence the cash cow for the Australian Government.
6. My focus over the past 3-5 years on the Share Market. It is the policies in effect, which is devaluing our investing dollar which would boost the economy. I will attach an example of the share loss for you to know of the manipulation causing more distrust than ever, with allowing companies to consolidate shareholdings—resulting in huge losses for the investor. (Attachment 3). You will see the buying \$ (Cost column) and the selling \$ (Market Value) after consolidations. It is eroding the Australian economy, because it has also eroded the trust in investing.

My analysis of the Australian economy, is that there is more black-market activity going on within the Australian Government, Pharmaceutical Companies, Insurance companies and Large Corporations, than the Medium and Small Businesses which you are trying to target with this Bill. (I also know someone personally who was bullied by a police officer to do an exam paper for them.)

The Government stands idly by and does nothing because it has already ensured its pockets are lined. The trust and the draining on the Australian economy is not because of the black market. It is because of the greedy corrupt government policies and systems we have in place, which are not benefiting the everyday Australian. They set Australians up to fail, not to be successful. Forcing and bullying us against our will does not build trust.

To Whom It May Concern:

Re: Mrs Karen Alexander

D.O.B. [REDACTED]

Karen has advanced cancer, and her condition is incurable. Her life expectancy is unknown, but she would like to finalise plans for her future as much as possible including her funeral preparation and grave site plot if possible. She'd be very grateful if you could consider her unusual circumstances and allow her the opportunity to choose a grave site plot.

Kind regards  
Yours sincerely

Report on Carcinogens, Thirteenth Edition

For Tabl

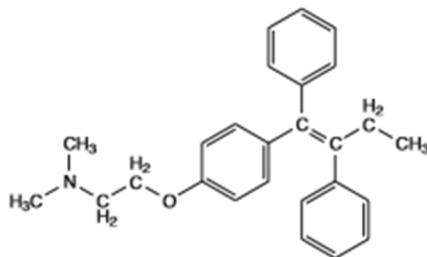

### Tamoxifen

CAS No. 10540-29-1

Known to be a human carcinogen

First listed in the Ninth Report on Carcinogens (2000)

Also known as (Z)-2-[4-(1,2-diphenylbut-1-enyl)phenoxy]-N,N-dimethyl-ethanamine

### Carcinogenicity

Tamoxifen is known to be a human carcinogen based on sufficient evidence of carcinogenicity from studies in humans.

PET Scan conducted in January 2006

#### FINDINGS

Imaging was obtained from the level of the vertex of skull to mid thighs. No other imaging was available for correlation.

\*\*

There is focal intense activity seen at the left parietal region of the skull, right parietal region of the skull near the vertex, several sites within the spine at about C6, T1, T2, T3, T5, T6 and S1, several right and left ribs, sternum, right ilium, left sacral etc, and left aspect of the pubic

## ATTACHMENT 2

I was in the medical system for 18 months when first diagnosed with terminal, incurable cancer. In that 18 months there were countless blood tests, PET scans, x-rays, heart scans, scans with dyes scans without dyes. Thousands of dollars spent on physiotherapy learning to walk again (not covered by the private health insurance). We had been in the highest private health insurance money could buy.

I was repeatedly subjected with being told I would to die shortly by doctors and nurses, given NO HOPE from all sides of my world.

I was to believe all the medical science and all the expert medical opinions. Where with one blood test they could tell me what I pill or drug I should take next.

NOW the kicker was after we had purchased the burial plot, and we approached the insurance company. I had over 12 months of medical scientific proof of my so call terminal cancer condition, and they treated me as a fraud, and a person who couldn't be trusted. So they didn't have to pay the insurance, and there wasn't anything anyone could do.

From their limited point of view how could someone with so much damage still be alive? I had to be a liar!

This is when my fight started in earnest. This is when the quiet achieving person, who was happy to please everyone and do anything for anyone, became an angry uncooperative person.

Being caught between the medical insurance, life insurance, Medicare and the so-called brilliant medical system we are living under in these trying times.

I have learnt to fight for the right to live, and to hell with the medical system, insurance scams, and anybody else who tries to tell me when I should live or die and whether I am a liar or a cheat.

I will be abrasive as sand paper to get my point of view across, and if that means mocking the medical system, and all it stands for then I will do that too.

What people are being subjected to in our current Australian medical system is inhumane. Especially people struggling with cancer. You see it all the time in aged care facilities. Where the residents are prescribed up to 20 different prescription drugs. They are too weak and old to put up any resistance and are easy pickings.

If everything has to be scientifically proven to enable these people to write and prescribe these drugs. Why? When a drug is scientifically proven to cause cancer, suicide tendencies or dementia they do not take it off the market, to save people's lives? Where are the formal inquiries?

Isn't it amazing that in the past 11 years, and with all those scientifically proven blood tests, scans and other scientific evidence which was accumulated while I was in the care of the medical system.

**There is not one product or item I have been able to claim on Medicare or the private health insurance, which has assisted with my fight with cancer.**

I ask the following questions.

Is our whole health and insurance system so broken and fatally flawed?

Is all the expensive medical equipment really trustworthy?

Could it just be the insurers don't want to pay their claims?

OR is the Australian Government selling out our health to the pharmaceutical companies?

All in the name of greed!

As cancer people we end up not only fighting for our right to live, but we fight the whole damn system.
