Re: Submission: Exposure Draft- Currency (Restrictions on the Use of Cash) Bill 2019

I wish to make known my opposition to this proposed legislation. It goes to the heart of our economic freedom and our democratic rights.

The government should be targeting large financial institutions involved in black money laundering. This proposed law will target individuals.

The government have not been transparent with introducing this draft and the consultation period is very short. If this law is passed our personal fundamental financial freedom could be given away.

Yours sincerely,
Gweneth Lawrence
