

12 August 2019
Manager Black Economy Division
The Treasury Langton Crescent
PARKES ACT 2600.

Dear Manager,
Re: Currency (Restrictions on the Use of Cash) Bill 2019

I am strongly opposed to the draft bill presented to parliament after 5.00pm
Friday 12 days ago.

Cash is legal tender endorsed by the government.

You will not be able to take your money out of the banking system.

Banks will have total control over your money if they fail.

We will be forced to endure negative interest rates, given no choice.

It's my basic right to use cash.

The vast majority of activities that are done to damage the economy are
done by large corporations.

Large connection to the drug trade all relevant legislation exists to be able
to probe the banks to probe money laundering.

It's a facist move to force people in to the banking system.

Another nail in the coffin for us with bail in laws.

The seven senators that passed the bail in laws.

Why should people pay to put money into these banks.

No media coverage.

It's a war on cash.

Under this bill it's so lose that this \$10,000 can be changed to a lower
amount like in some European countries.

Banks charging fees.

Royal commission into the banks failed.

Banks Identity theft.

Online gambling, people charged fees that have been dead 10 years.

You need to go after the big end of town and stop taking away basic rights of the people, stop listening too UN and the IMF would be a great start.

This is nothing more than going down the line of a police state.

Yours Sincerely,

Chris Patching
