Dear Sir,

You must have some thing to hide, by allowing only two weeks for public consultation.

I would like to make a submission about the intending Law.

Currency (Restrictions on the Use of cash) Bill 2019.

The biggest criminals for money laundering is not the local barber shop, or the fish and chip shop owner, it is the large banks and corporations. The royal Commission has exposed the corruption to the extreme. Banks / corporations Laundering are, in the order of Billions, the fish and chip shop owner is in the hundreds. Tackle the biggest launders.

The cash economy is what keeps the country going, the government and banks may get slightly less, but people will spend more, and money goes around.

This Bill is suppose to stop transitions of over \$10,000, and in the future it will be \$2,000 then \$500, at the Ministers discursion.

Do I trust Banks or Governments, does any body.

This is nothing to do with money laundering but more to force people to kept money in the banks, so when interest rates go negative, the banks steal our money, and banks and Governments have more control over me and you.

The only way to get things done quickly and efficiency (with over 50 years of experience as an engineer) is with cash. Here is my money, do the job, all other methods, you have to rely on "trust", hoping you will get your money. \$10,000 will get you very little, a broken washing machine, a broken sewage pipe, and a broken car at he same time, money gone.

I do "not" want this law to go through I want it rejected.

Regards
