Subject: franking credits

To whom it may concern

Just absolutely disgusted that the both Treasury and the Government should be looking at the legislation re the Offmarket Share Buy Back Bills.

A major plank of the election of the Labor Govt was that there would be no changes to superannuation . The bill totally undermines a co's ability to restructure and pay the franking credits owed to those of us as shareholders.

For Treasury and the Govt to retain any credibility this legislation must be abandoned.

Yours faithfully

Ian Chalk
