Dear Director,

As a self funded retiree, I wish to object to the changes muted to the Off Market Share Buy-Backs Bill, 2022.

My wife and I (79 and 83 respectively) have relied on dividend imputations for our income to independently support our relatively basic lifestyle. A loss or partial loss of this component of our income would render us eligible for the aged pension. We have always invested our resources with the long-term aim of remaining independent and have never sought government support.

Thank you for the opportunity to submit a response to the consultation of the Treasury Laws Amendment (Off-Market Share Buy-Backs) Bill 2022.

Yours Faithfully,

Alistair Murray.
