

**Director  
Corporate Tax Policy Unit  
Corporate and International Tax Division  
Treasury  
Langton Cres  
Parkes ACT 260**

Dear Director,

Thank you for the opportunity to submit a response to the consultation of the Treasury Laws Amendment (Off-Market Share Buy-Backs) Bill 2022.

[I/we] object to the proposed changes and believe the draft legislation is unfair to Australian companies and all shareholders.

Treasury Laws Amendment (Off-Market Share Buy-Backs) Bill 2022, if applied, will weaken the franking system.

Off-market share buy-backs and selective reductions of capital are important and established capital management tools for Australian companies and their boards. Any changes to these proven practices will negatively impact Australian companies' capital management choices and have unintended consequences.

Under the proposed amendments to off-market share buy-backs, companies would no longer be able to pay fully franked dividends to participating shareholders as part of the buy-back consideration paid. In addition, the government is also proposing to eliminate franking credits permanently to the extent it would have been paid out in a fully franked dividend to shareholders, should a company wish to conduct an off-market share buy-back in the future. So, not only is the government limiting a company's ability to distribute franking credits to shareholders, it is now proposing to permanently take those franking credits away from companies, in turn denying them the ability to distribute legitimate tax payments made on behalf of their shareholders. The above changes were added to the legislation and were not announced in the Federal Budget on 25 October 2022. It is a significant negative addition which looks to further disenfranchise Australian companies and investors.

[I/we] implore the government not to look at this proposal in isolation, but rather to view it in conjunction with the submission on Franked Distributions and Capital Raising (which closed for submission to your office on 5 October 2022). Together, these proposed changes undermine a system that has supported Australian companies and investors through more than three decades of economic stability and growth. During that time, the world has experienced a number of major macroeconomic events such as the global financial crisis and the current system has protected Australian companies, and in turn their shareholders, through these times of economic instability, reducing companies need to take on unnecessary debt. It has encouraged Australian companies to invest in and pay corporate tax in Australia and emboldened Australians to invest locally. This, in turn, has created

more jobs for Australians and provided the additional income tax revenue that Treasury and Government are currently seeking.

[I/we] believe that both the proposed changes fail to recognise the fundamental principle underlying the franking system and the reason for its creation, being the avoidance of double taxation on company earnings. If passed, the proposed changes will unfairly target retail investors, low-income investors and superannuation beneficiaries, while limiting companies' abilities to effectively manage their own capital.

[I/we] believe Treasury and Government are underestimating the long lasting and broad-reaching impact these changes will have on Australia and we ask you to re-consider making any changes.

**All my long working life I strived to build a strong superannuation position so I could retire without the need for a Government pension. I was attracted to convert my retirement funds into a SMSF due to the promises made by the Government. With the financial crisis in 2007/8, covid, the current war and Government policies the value of my original retirement is down by about 50%. I am now entitled to a draw a Government pension which infuriates me. At this point I am borderline with most of my assets in equities I am either just under or over the Assets limit. Your continual attempts to alter Franking credits rules will bring an end to my independent income. Please STOP attacking the elderly that are on very low incomes, during the Pandemic my annual income for 2021 was less than \$20,000 and that sum included Franking Credits. I have an 80yo pensioner friend that has hardly ever worked during his life and he could have, he received more money than me that year. I have been a tax payer and hard worker for more than 40 years and to this day have never received a Government pension, you are changing that.**

Yours sincerely,

Ross Wright
